8. RELATIONSHIP SUBSISTING BETWEEN THE APPLICANT TRANSFEROR COMPANY AND THE TRANSFEREE COMPANY

The Transferor Company is a wholly owned subsidiary of the Applicant Transferee Company. The Transferee Company is a related party of the Applicant Transferor Company as per the Companies Act, 2013 and there are transactions between the Applicant Companies as duly reported in the Notes to the Financial Statements. There are no common Directors on the Board of the Applicant Transferor Company and the Transferee Company except for Vinod Ranchhodbhai Tanti (DIN: 0002266) and Seemantinee Shashank Khot (DIN: 7026548). Apart from the above, there is no other relationship between the Applicant Transferor Company and the Transferee Company.

9. Rationale and Salient Features of the Scheme:

The Transferee Company is primarily engaged in the business of manufacturing and supply of WTG while the Transferor Company is engaged in the business via the following undertakings, viz., OMS undertaking and other business undertakings. The Transferor Company is a wholly owned subsidiary of the Transferee Company.

- (i) The energy and climate policies being implemented by major economies worldwide, demonstrate a remarkable level of ambition and commitment to supporting wind energy and other renewable energy sources. These developments signal a promising future for the growth and advancement of renewable energy and renewable energy technologies propelling the industry to redefine and forge innovative partnerships with governments, cities, communities, investors, and customers. There is increase in the demand of the wind capacity on account of increased wind, solar, hybrid, RTC and FDRE tenders, national hydrogen mission, MNRE's removal of tariff ceiling, improved technology, industrial tariffs and demand of wind energy from commercial and industrial consumers, power storage and central government allocations under strong off-takers. The Transferor and Transferor companies, founded with a deep understanding of the environment and sustainable development, have been at the forefront of renewable energy as a key solution provider since their inception. By combining forces, the Companies aim to create a more robust and competitive entity that is well-equipped to navigate the complexities of the national and international *renewable energy landscape*.
- (ii) The amalgamation will consolidate the business of the Transferor Company and the Transferee Company which will result in focused growth, operational efficiencies and business synergies of the WTG business and OMS business. In addition, resulting corporate holding structure will bring enhanced agility to the business ecosystem of the merged entity. Further the amalgamation could potentially reap strategic benefits including but not limited to the following:
 - a. Stronger financial position: In an increasingly competitive global market, the financial strength of a company plays a critical role in its ability to secure large contracts and continue to expand consistently. Moreover, as the turbines have life cycle of 25 to 30 years, the customers are more likely to rely on an OEM whose presence can be assured across the lifecycle. A stronger balance sheet helps build a value proposition for customers making it a key metric to award bigger projects to financially sound organisations. A strong net worth signifies that the company possesses enough financial resources to successfully complete larger projects without negative repercussions. It gives the assurance and confidence to stakeholders about the company's capability to take on, deliver, and succeed in high stakes contracts.
The merger of the Transferor Company into the Transferee Company would help in strengthening the financial robustness, resulting in a highly fortified standalone balance sheet and profit and loss statement which benefits the Companies as follows:

- (i) stronger financial health plays a strategic role in enhancing the consolidated entity's potential to bid, secure and execute big-ticket contracts in the domestic as well as overseas markets; and
 - (ii) positioning the consolidated organisation more aggressively and perceptibly in the global markets thus paving the way for a stronger international presence and tapping back into the overseas markets broadening the client base.
- b. Contracting: Some of the customers are inclined more towards contracts with single entity, demonstrating a clear preference for dealing with a single entity for both WTG delivery and OMS services. For some customers (e.g. PSU customers) it is a mandatory tender condition to participate for both WTG delivery and OMS services from single entity.
 - c. Elimination of inter-company outstanding: There are inter-company loans between the two entities and elimination of this leads to a stronger, more resilient financial position and enhanced business's creditworthiness. Moreover, the freed-up capital can be reallocated to other productive areas, further strengthening the company's financial stability and growth prospects.
 - d. Efficient utilization of resources: Post-merger, the consolidated business can strategically manage finances which shall help optimize the cash flow. The unified cash flow management system provides an opportunity to reallocate resources effectively, reinvesting in areas that promise better returns. With shared financial goals, the consolidated business can leverage collective cash flow to fund growth opportunities, thereby tapping the new and bigger business opportunities market is offering in an effective manner..
Unfettered access to cash flow generated by the combined businesses which can be deployed more efficiently to fund organic and inorganic growth opportunities and to maximize shareholders value; It strengthens the dividend paying abilities of the Transferee company.
 - e. Streamlining of group structure and benefit of combined resources: The proposed amalgamation of the Transferor Company with the Transferee Company will create a streamlined group structure which will assist in more efficient utilization of the capital.
 - f. Efficiency in business operations of the WTG business and OMS business: The proposed amalgamation of the Transferor Company with the Transferee Company is expected to create greater efficiency due to economies of scale, elimination of duplication of work and rationalisation and reduction of compliance requirements;
 - g. Sharing of best practices in sustainability, safety, health and environment: Adoption of improved safety, environment and sustainability practices owing to a centralised committee at combined level may provide focused approach towards safety, environment and sustainability practices resulting in overall improvements.

The amalgamation of the Transferor Company with the Transferee Company will combine the business, activities and operations of the Transferor Company and the Transferee Company into a single company with effect from the Appointed Date (as defined hereinafter) and shall be in accordance with the provisions of the Income Tax Act, 1961, and rules framed thereunder including Section 2(1B) thereof or any amendments thereto.
