Dear Sirs,

Sub.: Suzlon and Jindal Renewables Expand Partnership with additional 302.4 MW Wind Project to Accelerate India’s Green Steel Production.

This is to inform that Suzlon and Jindal Renewables Expand Partnership with additional 302.4 MW Wind Project to Accelerate India’s Green Steel Production. The press release in this regard is attached herewith.

This is for your information as also for the information of your members and the public at large.

Thanking you,

Yours faithfully,
For Suzlon Energy Limited

Geetanjali S.Vaidya,
Company Secretary.

Encl.: As above.

For Immediate Release | 04 December 2024

Suzlon and Jindal Renewables Expand Partnership with additional 302.4 MW Wind Project to Accelerate India's Green Steel Production

Suzlon now has India's largest cumulative C&I order from a single customer, totaling 702.4 MW in Karnataka. Last month, Jindal Renewables partnered with Suzlon for 400 MW order in the Koppal region

Key Highlights of the Order:

India's largest cumulative capacity – 702.4 MW
C&I orders from a single customer

To supply **96 S144 WTGs** with a rated capacity of 3.15 MW each

Second Project to be executed in the Koppal region

Electricity for steel plants in **Chhattisgarh & Odisha**

Pune, India: Suzlon and JSP Green Wind 1 Pvt. Ltd., a subsidiary of Jindal Renewables, have expanded their partnership with an additional 302.4 MW wind power project in the Koppal region of Karnataka, aimed at accelerating India's green steel production. This second order brings the total capacity from Jindal Renewables to 702.4 MW, making it Suzlon's largest-ever commercial and industrial (C&I) order from a single customer. Last month, Suzlon secured a 400 MW captive wind power project with Jindal Renewables in the same region, highlighting the strategic collaboration between the two companies.

Commercial and Industrial (C&I) customers now account for 56% of Suzlon's total order book, which stands at a record 5.4 GW—Suzlon's highest-ever order book to date.

Under the strategic agreement, Suzlon will supply 96 state-of-the-art S144 wind turbine generators (WTGs) with Hybrid Lattice (HLT) Towers, each rated at a 3.15 MW capacity.

The energy generated will be utilised for captive consumption in steel plants located in Chhattisgarh and Odisha, enhancing their operational sustainability and contributing to India's green energy transition.

Girish Tanti, Vice Chairman, Suzlon Group, said, *"We are delighted to announce the repeat order from Jindal Renewables, which further strengthens our partnership and underscores the trust they have placed in us. This collaboration will propel our joint green steel mission forward, while significantly contributing to India's ambitious renewable energy target of 50% electricity from non-fossil fuels by 2030."*

Bharat Saxena, President, Jindal Renewables, said, *"This project aligns perfectly with our commitment to driving sustainability and decarbonisation in the steel industry. Partnering with Suzlon for lower emission steel production is just the beginning—there will be many more such initiatives as we continue to lead the way in adopting renewable energy solutions."*

JP Chalasani, Chief Executive Officer, Suzlon Group, said, *"Initiatives like this are critical for transforming hard-to-abate sectors, such as steel, into models of sustainable growth. The integration of renewable energy into industrial operations is not just an opportunity but a necessity for a cleaner and greener future. We encourage more organisations to reimagine their operations and embrace renewable energy solutions. Partnerships like ours with Jindal Renewables set a benchmark for how industries can innovate to meet both economic and environmental goals."*

About Jindal Renewable Power Private Limited (JRPL)

Jindal Renewables (JRPL) aims to become a pioneer in renewable energy projects in India, currently developing close to 3 GW of diverse renewable assets with power off-take completely locked in. It aims to develop around 12 GW of renewable energy assets, storage facilities, as well as significant green Hydrogen production facilities by 2030 and become amongst the largest de-carbonisation solution providers in the country.

About The Suzlon Group

The Suzlon Group is a leading global renewable energy solutions provider, with approximately 20.9 GW* of wind energy capacity installed across 17 countries. Headquartered at Suzlon One Earth in Pune, India, the Group includes Suzlon Energy Limited (NSE: SUZLON, BSE: 532667) and its subsidiaries. A vertically integrated organisation, Suzlon has in-house R&D centres in Germany, the Netherlands, Denmark, and India, and world-class manufacturing facilities across India. With 29 years of operational excellence and a diverse workforce of over 7,700 employees, Suzlon is India's No. 1 Renewable Energy Solutions company, managing ~15 GW of assets and an additional ~6 GW installed outside India. Its portfolio includes the advanced 2.x MW and 3.x MW series of wind turbines.

*Global installations of Suzlon manufactured wind turbine generators. Data as of 30th September 2024
